

# RESILIENCE ACTIONS: RUNAWAY FIRES

Examples of democratically selected socio-political and infrastructural strategies to enhance resilience in South African townships.

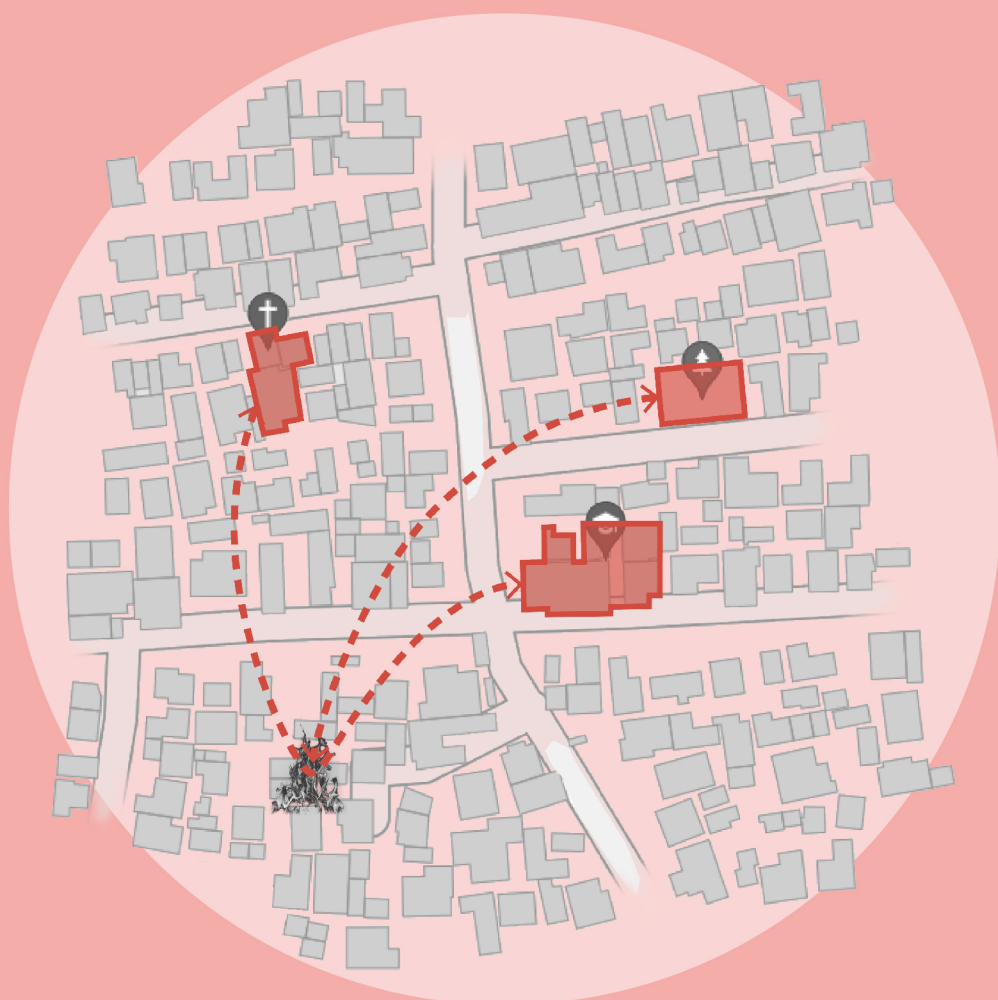

SOCIO-POLITICAL

**ENHANCE ACCESS**  
to welfare, documentation, security and planning

**DEVELOP & DISSEMINATE** social media response tools for public safety

**SUPPORT** communities to mobilise and organise

**PROMOTE** knowledge and awareness through campaigns on mitigating environmental disasters

INFRASTRUCTURAL

**REFINE** integrated ER strategies and household responses to fire

**PROVIDE** access to low-cost fire responses e.g. sand, buckets and fire blankets

**ALLOCATE** open space and public institutions for emergency refuge

Min required firebreak

**4. WORK TOWARDS** enhanced public infrastructure standards (eg: broadening and maintaining corridors, roads and firebreaks)
