

RESILIENCE ACTIONS: LOCALISED FLOODING

Examples of democratically selected socio-political and infrastructural strategies to enhance resilience in South African townships.

EMBRACE climate activism and leadership

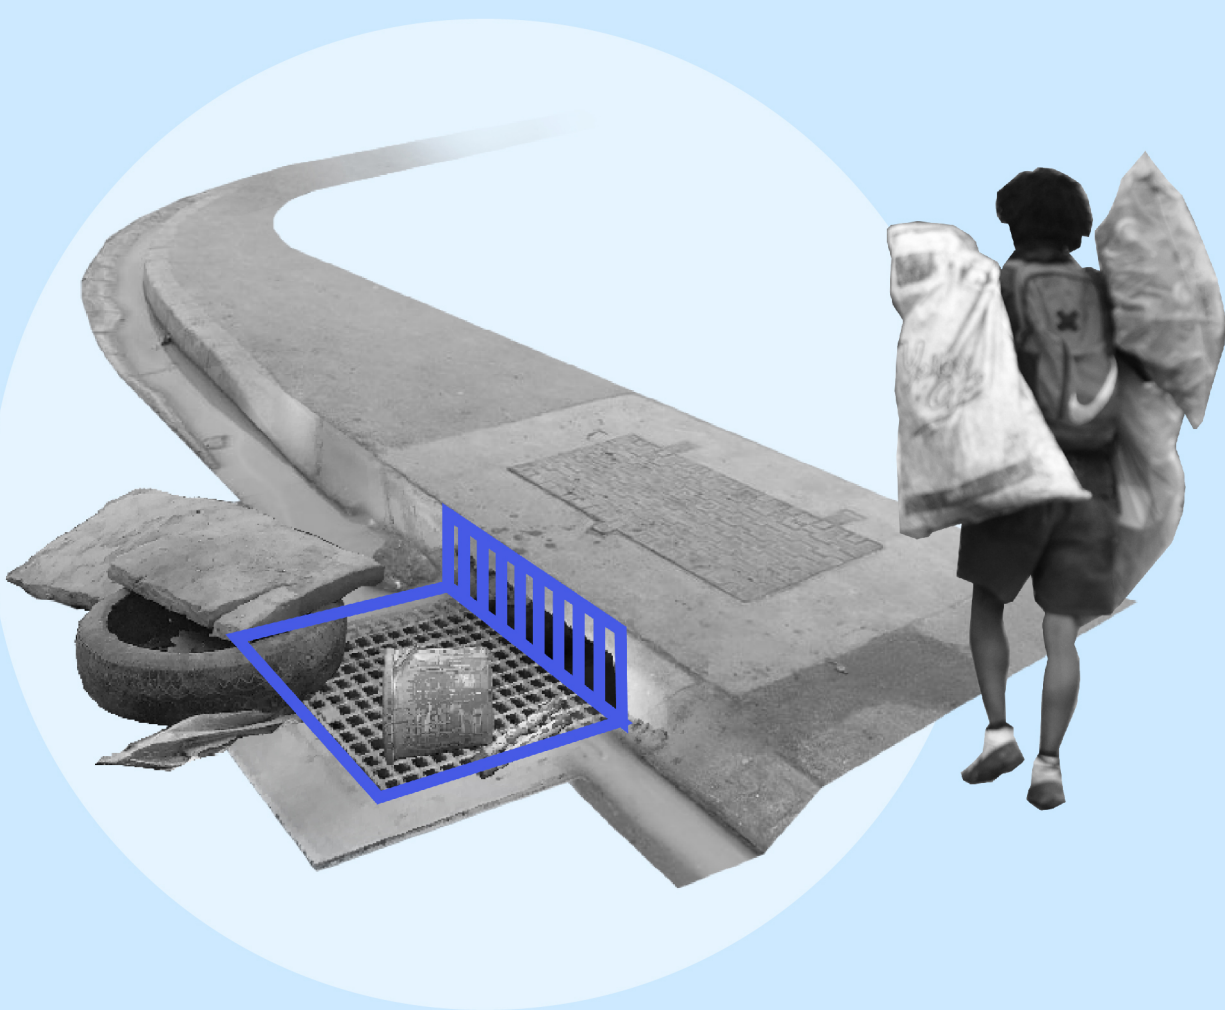

PROMOTE knowledge and awareness through campaigns on mitigating environmental disasters

SUPPORT communities to mobilise and organise

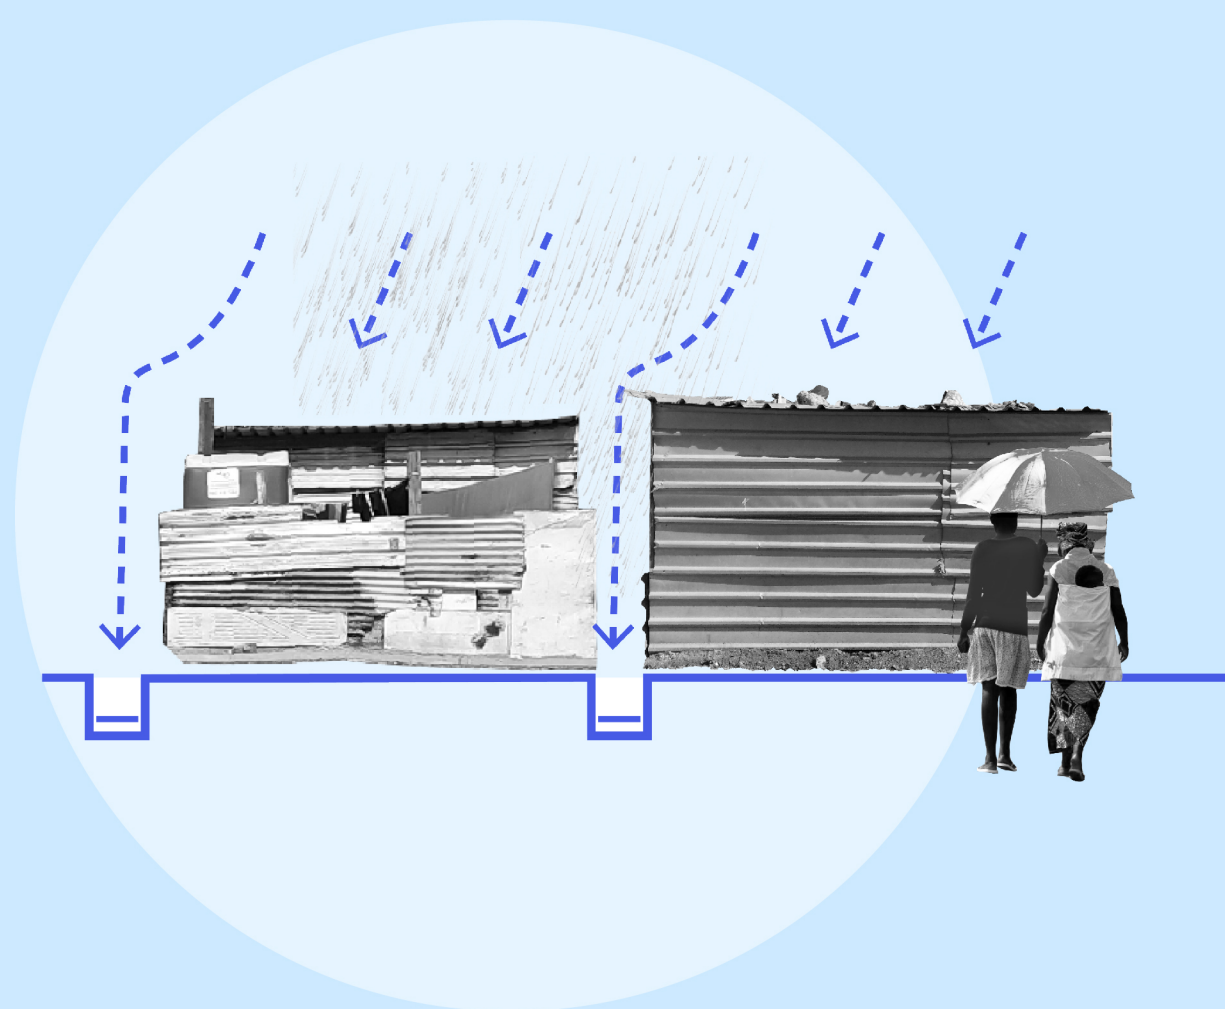

ENHANCE solid waste management practices

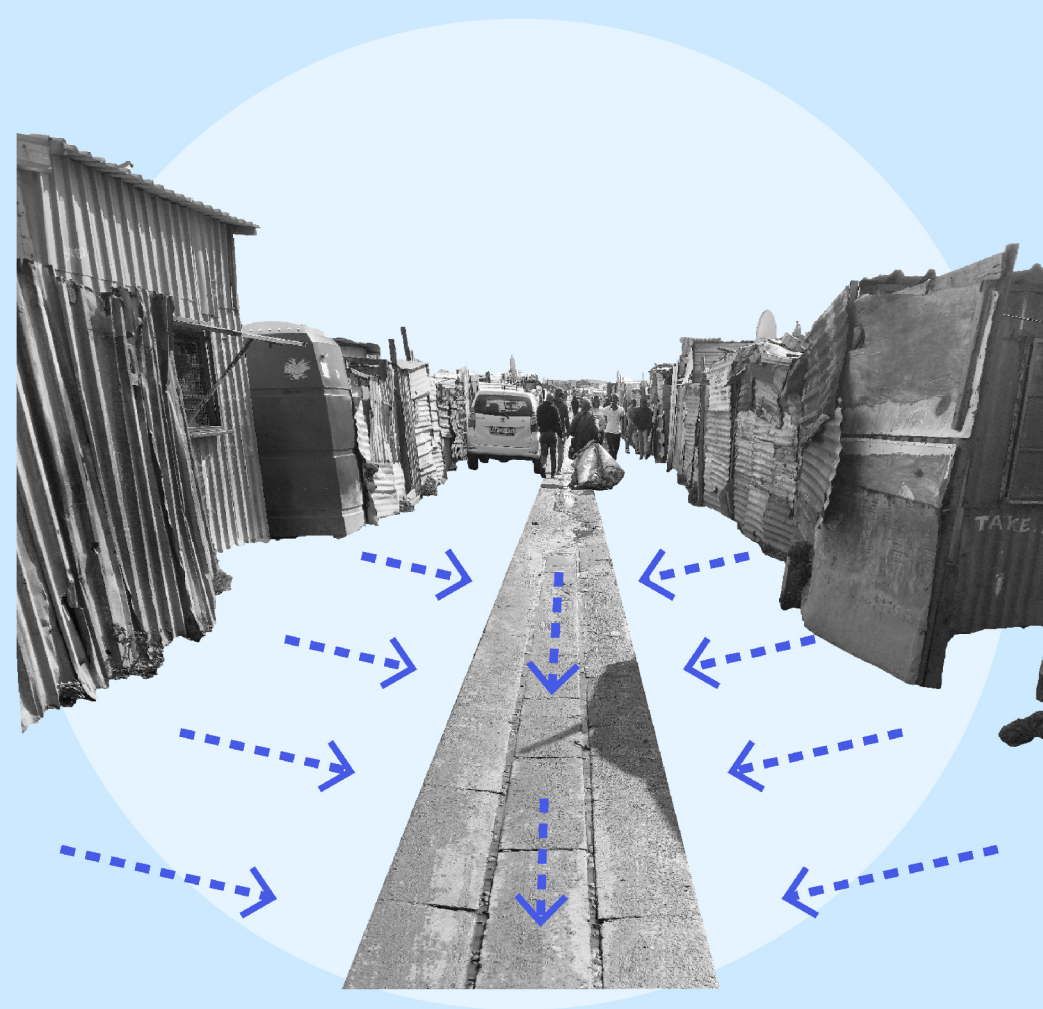

MAINTAIN and **OPTIMIZE** infrastructure (such as drainage systems, roads, taps and toilets)

ENCOURAGE residents to 'build up' to prevent water running into their dwellings

DEVELOP new tools and methods of channelling water away from dwellings

WORK TOWARDS enhanced public infrastructure standards (e.g. maintaining roads and drainage systems)
