

# RESILIENCE ACTIONS: WATER SHORTAGE

Examples of democratically selected socio-political and infrastructural strategies to enhance resilience in South African townships.

**BUILD** sustainable partnerships, community agreement on water usage, and sanction transgressions

**UNLEARN** damaging water consumption behaviours, and educate residents

**COMMUNICATE** relevant water news

**ENHANCE** municipal approach to management of water, billing and public infrastructure

**OPTIMISE INFRASTRUCTURE** by building water zones with washing facilities, toilets and bins

**ENHANCE** solid waste management

**INNOVATIVE INTERVENTIONS** e.g. water storage tanks, well points, water filters

**ENHANCE** municipal approach to management of water, billing and public infrastructure
